Aquacentre Pardubice

Location
Pardubice

Investor
Municipality of Pardubice

Construction period
09/2010 – 06/2012

Type of construction
Leisure

Scope of services
Construction

“ A feature unifying interior areas are ceramic and glass mosaic surface finishes. The original character of the areas is enhanced by sophisticated lighting. ”

The project of reconstruction involved preservation of the existing 50-metre swimming pool and the adjoining facilities as well as demolition of the premises housing the diving pool and the heat exchanger room to allow for construction of a recreational water park and spa facilities. As regards the swimming pool, the only structures which were kept in their original state were its foundations, load-bearing reinforced cast-in-place concrete structures with brickwork and steel columns along the eastern and southern façades, a cast-in-place concrete pool basin and steel roof trusses. A new stainless steel pool was fitted in and the building was expanded to feature a new entrance hall. The new parts, i.e. the water park and the spa, are housed in cast-in-place reinforced concrete hall-t...
