“ The complete execution of a reinforced concrete building frame with increased requirements for the quality of the visible surfaces. ”

The design of Livesport's Class A office building in Nové Butovice has 3 underground and 11 above-ground floors, of which 10 are intended for use as offices and the 11th is for technical facilities. In total, it will offer 15,303 m<sup>2</sup> of floor area for offices, 258 parking spaces, a restaurant, and a conference hall for 100 guests. The company VCES has executed the entire reinforced concrete frame, which meets increased requirements for the quality of the visible surfaces. The bottom section of the structure has been implemented using "white tank" technology. The concrete in the foundation has been executed using a sandwich panel system that allows for the possibility of movement within the group of foundations slabs. One interesting architectural detail can be seen in the V-shaped...
