Erste Group Immorent ČR

Construction period

09/2011 – 03/2014

Type of construction

Leisure, Development

Scope of services

**Construction & Property
Development**

The new hotel building with a total of 160 guest rooms is located in the centre of Prague and has 9 floors above ground and 1 floor below ground. The basement includes 29 parking spaces and is connected with the ground floor by a ramp. In addition, it houses a part of the M&E technology (low-current distribution room, UPS), rooms for the main gas shut-off valve, main water shut-off valve and water metering technology, a cleaning room and the hotel's storage area. On the ground floor there
