

Chrudimpark Residence

“ Modern living which is both in city center and in harmony with nature. ”

Linkcity's own development project located in the center of Chrudim meets high requirements for modern residential housing. The Chrudimpark Residence project offers apartment buildings connected to the town park, which create a unique place to live. Currently, there are three more apartment buildings under construction - Akát (acacia), Ambroň (sweetgum) and Azalka (azalea). They will be connected by a basement with garage parking spaces and each building will house 30 residential units. Phase "A" is a direct follow-up to the 4 previously completed apartment buildings with a total of 99 residential units and one commercial unit. Apartments ranging in floor area from 48 m² to 97 m² offer spacious terraces, enclosed balconies or front gardens. All the new buildings have six floors. ...
