A BOUYGUES CONSTRUCTION COMPANY

Shared innovation

Linkcity's own development project located in the center of Chrudim meets high requirements for modern residential housing. The Chrudimpark Residence project offers apartment buildings connected to the town park, which create a unique place to live. Currently, there are three more apartment buildings under construction - Akát (acacia), Ambroň (sweetgum) and Azalka (azalea). They will be connected by a basement with garage parking spaces and each building will house 30 residential units. Phase "A" is a direct follow-up to the 4 previously completed apartment buildings with a total of 99 residential units and one commercial unit. Apartments ranging in floor area from 48 m2 to 97 m2 offer spacious terraces, enclosed balconies or front gardens. All the new buildings have six floors. ...
