the fields relating to informatics. ”

The building will become the headquarters for CIIRC, the university rector's office, a number of departments from the Electrotechnical Faculty, and part of CTU's Computing and Information Center. The university building is composed of two parts, which are mutually interconnected at three levels. The new construction of Building A consists of ten above-ground and three underground floors; Building B (originally the Technical Canteen) had its ground plan expanded and was converted into a building with seven above-ground and one underground stories. The underground area of Building A houses a fully automated parking system with a capacity of 188 parking spaces. A parking lot for 23 cars is located under the new wing of Building B. Study rooms, laboratories and an incubator, lecture and ...
