

Datwyler Sealing Technologies CZ – New Factory Buildings

“ Datwyler has increased its production capacity for sealing components. ”

The manufacturing facility was expanded to include two new production buildings, No. 5 and No. 6, with technical facilities and laboratories. A new parking lot, an access road, and other routes have also been built - as well as gas and water mains and a sewer system. The project's execution required a comprehensive solution for coordinating the construction with simultaneously ongoing production. Factory No. 5 is a 3-bay building with dimensions of 42 x 76 m and it was built first, and after production was moved, part of the existing factory No. 3 was demolished and factory No. 6 was completed – 1-bay building with built-in floor and total built-up area of 24 x 42 m. The factories are three- and two-floor buildings with foundations that use reinforced concrete piles with a founda...
