**The Czech Republic -
Employment Office in
Frýdek-Místek**

Construction period

07/2006 – 12/2007

Type of construction

Office

Scope of services

Construction

The new Employment Office was designed as a four-storey building in the shape of a lightly dynamic ashlar with an angular centre. The parking places are situated on the 1st underground floor, as well as technical room (the exchange station), workshops, a cafeteria and a

large conference room. Three above-ground floors house offices for 130 employees, counters for dealing with clients, and smaller meeting rooms. In terms of structure, the building was designed as a steel-concrete pre-fab skeleton with fill-in brickwork. Internal partitions are made of plaster boards or aluminium (these are movable) allowing interchangeability of the inner space. The facade combines red brick rough grain plaster with smooth areas. Enamelled facade windows form an interesting architectural feature. A car ...
