Shared **innovation**

It consists of an L-shaped main structure with dimensions of approximately 60/60 m, from which three rectangular lecture halls jut out. The building has eight above-ground and three underground storeys. The above-ground storeys are vertically connected by three atriums with light streaming through a glass roof. The underground storeys are intended mostly for parking; the remaining section houses technical and administrative facilities, a cafeteria, planography and a sculptor's studio. On the ground floor are the main entrance and reception, in addition to communication space, halls, department of student affairs, central dressing rooms and lecture halls with the capacity ranging from 80 to 300 students. Other storeys house teachers' offices, lecture rooms, studios, and other teaching an...
