IKEM – Annex to the Cardiocenter

Location
Prague

Investor
Institute for Clinical and Experimental Medicine

Construction period
12/2001 – 09/2005

Type of construction
Health care

Scope of services
Construction

With the new Cardiocenter, an integrated complex was created for all fields and activities of the Institute for Clinical and Experimental Medicine (IKEM). In the new areas, IKEM gained an in-patient department and further operation rooms and laboratories. The number of beds in the in-patient block, which is located in a seven storey building, rose to 330 beds. The post-operation department is connected to the Cardiocenter's operation rooms building by a suspended roofed

corridor. The treatment block, together with the operation rooms, is housed in the five storey building in which there are located three twin and one single operation room with the necessary peripherals. In the seven storey building we can find the block for acute and intervention cardiology, further enhanced by a centra...
