Shared **innovation**

manufacturing plant. ”

The paint shop is part of the newly constructed Jaguar Land Rover manufacturing plant in Nitra, Slovakia; its initial production capacity is 150,000 vehicles annually. Part of the contract was to provide all the construction work, including mechanical & electrical as well as creating the groundwork for installing specialized production technology and providing the execution design. The new paint shop building is 400 m long, with a height of 28 m and an area of 52,000 m². The building's construction solution is comprised of steel construction based on deep piles and pile caps. The cladding has been executed using sandwich panels with an overall area of ca. 30,000 m². The roof construction has been entirely realized taking into account the requirements for FM Approval. The facto...
