## future tenants` needs. ”

The logistics facility in Hradec Králové is the first development project of Linkcity in the segment of industrial buildings. The main building has dimensions of 230 m by 48 m, with a clear height of 10.5 m. Structurally, it is designed as a precast concrete frame with pile foundations and sandwich panel cladding. The floor is a jointless steel-fibre-reinforced concrete slab.

The building includes built-in office premises installed according to the detailed requirements of each tenant. The internal structures are a combination of a steel structure with a concrete slab, plasterboard partitions and suspended ceilings. The total built-up area is 7,795 m<sup>2</sup> and is divided into 3 rental units.

The project used a BIM model in the design phase, which can also be used for subs...
