**Office Center Stodůlky  
LAMBDA a.s. (FINEP CZ)**

Construction period

**10/2012 – 05/2014**

Type of construction

**Office, Green buildings**

Scope of services

**Construction**

“ Thanks to the use of modern intelligent building management systems, the building falls into the category of smart buildings. ”

The office building is part of the newly created Prague district - City West. It is divided into two units separated by expansion joints, namely Part C1 and Part C2. Six above-ground floors of Part C1 and five aboveground floors of Part C2 offer a total of 20,000 m<sup>2</sup> of office space; the top floor is dedicated to mechanical equipment. Three underground floors feature 11,500 m<sup>2</sup> of parking space for a total of 332 cars. The building is rectangular in plan, with six wings forming an E-shape, which create semi-enclosed green atria providing daylight for maximum office space. The foundation system of Part C1 uses bored piles, whereas Part C2 has a concrete slab foundation, which is 500 mm thick. The structural system of the building features a cast-in-place reinforced concrete skeletal frame wit...
