Shared **innovation**

The office building is part of the newly created Prague district - City West. It is divided into two units separated by expansion joints, namely Part C1 and Part C2. Six above-ground floors of Part C1 and five aboveground floors of Part C2 offer a total of 20,000 m² of office space; the top floor is dedicated to mechanical equipment. Three underground floors feature 11,500 m² of parking space for a total of 332 cars. The building is rectangular in plan, with six wings forming an E-shape, which create semi-enclosed green atria providing daylight for maximum office space. The foundation system of Part C1 uses bored piles, whereas Part C2 has a concrete slab foundation, which is 500 mm thick. The structural system of the building features a cast-in-place reinforced concrete skeletal frame wit...
