medical centre building. ”

The EPSILON medical and administrative building located on the Budějovická Medical Centre premises has undergone a complete refurbishment, which involved construction works on the existing floors (1st - 3rd), extension of the 3rd floor and construction of the 4th - 8th floors. Structurally, it is an assembled precast reinforced concrete frame with custom-made precast or cast-in-place elements. The load-bearing structure on the 4th - 8th floors consists of a precast frame (supplied by our own division manufacturing precast concrete elements), including brickwork and Spiroll slabs. New plastic windows were installed in the entire building and a thermal insulation composite system was installed on the building envelope. The multi-story car park is a new three-story building with a flo...
