Shared **innovation**

warehouses ”

KRPA FORM specializes in the production of various paper forms, rolls and bags, including printing. Thanks to the new plant, it will be able to increase its bag production by 100 %.

The overall concept of the facility rehabilitation allows for transfer and expansion of production into a new plant with an area of 4,310 m² and adjustments to the existing production plant.

The new plant is rectangular in shape with maximum dimensions of 98.49 by 44.12 m. The ridge height of the plant building in the dispatch area is 12.98 m and 7.31 m in the other parts. The structural system of the new building is made of a precast frame with pile foundations. The cladding system uses mineral wool sandwich panels. The building interior features a concrete industrial f...
