Leisure

Scope of services

Construction

“ Transformation of underused cultural centre into modern facility for cultural and social events ”

www.vces.cz

Shared **innovation**

The project involves the renovation and extension of the existing Cultural Centre. The theatre auditorium and stage have undergone a complete transformation, with the acoustic ceiling waves being preserved as the dominant feature. All the equipment, audiovisual and projection technology, including 3D cinema and surround sound, have been replaced with brand new systems. The capacity of the auditorium is now 333 seats and 4 designated disabled spaces. On the second above-ground level, a multi-purpose dance hall spanning 433 m² has been constructed, featuring an acoustic wall that can be used to divide the space as required. In addition, the project includes the construction of a new 100-seater concert hall for the local art school. This new structure has been built as an extension conn...
