

Tivall Frying Line

“ The most modern manufacturing plant of frozen vegetarian food in the Central Europe. ”

The project introduces an extension of the current manufacturing plant used for production of frozen vegetarian products. The first stage includes a construction of a manufacturing building with a new frying line together with also enlarging technological background facilities. The manufacturing building with clean premises used for food industry is partially two storeys building with a module dimensions of 205 metres by 20.1 metres and is connected to the current manufacturing plant. The carrier framework is supported by reinforced concrete in a combination with steel design. The foundations are built on piles. The building encasement is proposed to be constructed from exterior sandwich panels and the roof covering is a single layer laid on a trapeze metal plate. The inner partition wa...
